

E TAYLOR METAL RECYCLING LTD

Environment Policy

E Taylor Metal Recycling Ltd are committed to the protection and consideration of the environment and the prevention of pollution and other adverse environmental impacts in our companies activities. All work activities are performed in accordance within our relevant legislators licence.

Our work in metal recycling actively benefits the environment by ensuring that we work together with a variety of companies in the recycling industry to ensure that together we help in reducing higher energy consumptions and other environmental impacts that might otherwise arise through alternative processes.

Attention will be paid to all materials purchased, processed, stored and transported by our company to ensure we minimise environmental impact and ongoing improvements are made and monitored to our site operations.

Requirements are placed upon customers and suppliers to ensure that they adhere to and operate in accordance with our environment procedures and aspire to an equal standard of environmental protection and compliance.

This policy is displayed on site and is communicated to employees, customers, suppliers, visitors and the public.
